

HOT FILL FORM SEAL MACHINE

- The Regethermic Hot fill vertical form fill machine is designed for high speed bag filling direct from larger size vessels starting from 300 litres
- Casings are formed from a continuous flat form roll
- Once a program is set for a specific product simply let the machine do the rest
- The Vertical Form Filler is complimented when used in conjunction with conveyor belt
- Hot casings may be deposited directly into Regethermic Tumble Chiller to complete the process
